

## Happy National Nursing Week!

May 8-14, 2017

A heartfelt  
**th**♥**anks**  
for all you do

**National Nurses week**

## president's message:

Hello All

As PeriAnesthesia Nurses we provide care for patients in preadmission clinics, same day surgery units, day of surgery units, ambulatory care clinics, pain management clinics, endoscopy clinic and post anesthesia care units. We are passionate about the care we give and our profession.

Nursing is an art mixed with science and it is through our involvement that we will shape our future. We must lead in the decision making for our profession or someone else will do it for us.

During my thirty years as a nurse I have seen many changes. Technology has been a driving force in advancement in nursing and patient care. Gone are the days when a cholecystectomy would be hospitalized for 5-7 days' post-surgery. Presently most would only stay less than 5-7 hours.
